

## WHAT WILL I LEARN?

The Computer Information Technology curriculum prepares graduates for employment with any organization that uses computers to process, manage, and communicate information.

Course work will develop your ability to communicate complex technical issues related to computer hardware, software, and networks in a manner that computer users can understand.

Classes cover computer operations, repair, and terminology, operating systems and other software installation and configuration, databases, networking, security, and technical support.

## IS IT RIGHT FOR ME?

In order to decide if the Computer Information Technology Program at Carteret Community College is the right choice for you, ask yourself the following questions:

Do you enjoy working with computers?

Do you have the patience to explain complicated technology to users?

Are you comfortable working on your own?

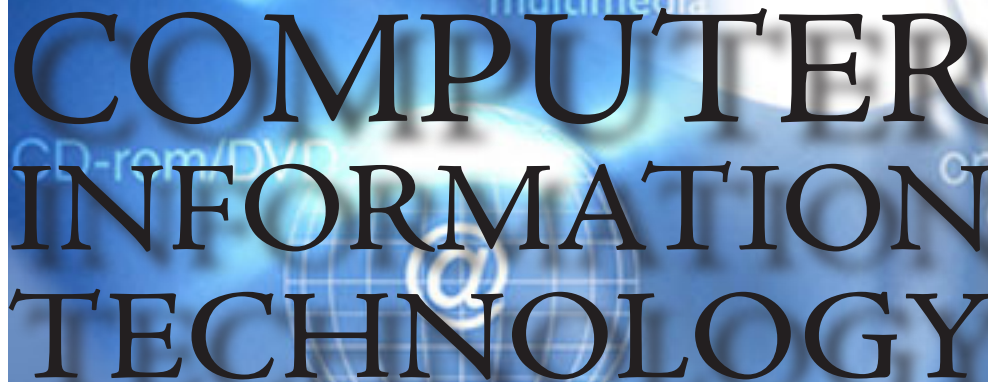

Are you detail oriented?

If the answers to these questions are yes, then a career in Computer Information Technology may be the right choice for you.

## WHAT JOBS ARE AVAILABLE?

Graduates are qualified for employment in entry-level positions with businesses, educational systems, and governmental agencies which rely on computer systems to manage information. Graduates have found work as:

-  Computer Technicians
-  Help Desk Support
-  Network Assistants
-  IT Personnel
