

## WHAT WILL I LEARN?

The Web Technologies curriculum prepares graduates for careers which depend on the power of the web to send and receive information.

Course work in this program covers the terminology and use of computers, network devices, servers, and databases. You'll learn programming languages such as HTML, JavaScript, PHP, and others. Courses in graphics and multimedia will give you the ability to create visually appealing sites.

Graduates will qualify for career opportunities as designers, administrators, or developers in the areas of web applications, websites, web services, and related Internet industries.

## IS IT RIGHT FOR ME?

In order to decide if the Web Technologies Program at Carteret Community College is the right choice for you, ask yourself the following questions:

Are you creative?

Do you enjoy working with computers?

Are you comfortable working both on your own and in teams?

Are you detail oriented?

If the answers to these questions are yes, then Web Design may be the career for you.

## WHAT JOBS ARE AVAILABLE?

Graduates of the Web Technologies program at Carteret Community College have found employment in a wide variety of careers, including:

-  Web Designers/ Developers
-  Company Webmasters
-  Graphic Artists
-  Internet Programmers

## OUR MISSION

Carteret Community College is committed to being a leader in improving the quality of life for all citizens of Carteret County and Eastern North Carolina, by offering high quality, innovative education, training, enrichment, and support to all who need and value these services.
